Volume 12 Issue 1

February 2005

From the President's Corner

By Dan Street, K1TO

2004 was in many ways a year to forget. We are rapidly approaching the one-year anniversary of the passing of our founding father, Jim, K4OJ. Up the road in GA, the loss of Bill, W4AN is still being deeply felt as well. BPL continues to rear its ugly head, but fortunately, not very extensively in FL yet. And almost all of us suffered damage from some combination of C*****, F*****, I*** and J*****. Many of us have not fully rebuilt yet, but we will.

In the light of that situation, it is all the more amazing that this club put nearly 100 Million points on the board during CQWW, over 3 million in SS and over 10 million in the 10-Meter Contest, all near a sunspot minimum!

Those that were unable to fully rebuild chose to go on a DXpedition, or to use the single band for which their antenna(s) still work(s), or to join a multi-op. And we are doing it in ever-growing numbers. Every score counts. Thanks to all of you who made the effort to get on and support our club so far this season. For the most part, we have been rewarded with conditions that are better than one would expect as we approach rock bottom in the sunspot cycle. The Team Contesting concept brought out a lot of us in WW SSB - we should do that again this year!

In brighter news, the FCG grew from 172 to 193 members in 2004. We lost a few, but gained nearly 30 new members! In the ARRL DX Test for 2004, we cracked the Unlimited club barrier (>50 entries) for the first time ever. And being a Red Sox fan since the mid-60s, I was personally thrilled to see them win a World Series in my lifetime! So, 2004 was not completely bleak.

We're all thankful that Charly, K4VUD survived the earthquake and subsequent tsunamis over in the Indian Ocean. It's encouraging to see the VU government finally recognizing the value of ham radio and easing the difficulty of getting licensed in VU4, but it's a shame that it took a huge disaster to spark that to happen. See page 15 for a great story of Ellen, W1YL reaching out with assistance to the victims from the OJ/CW memorial fund.

Speaking of getting governmental agencies to recognize hams as valuable, check out the story and photos on pages 14 - 15. Eric, K9ES and others did an incredible job of set-

ting up a multi-multi for Skywarn Recognition Day and making the most of it on the air!

At long last, FQP log checking for 2004 is complete. With over 700 logs and over 80,000 QSOs to cross-check, the effort required increases each year. We're now compiling the line scores, plaque winners, write-up, certificates, etc. Thanks to WD4AHZ, WC4E, K4XS & K4XSS and others who help to make the FQP just a great event each year! There are some razor thin margins of victory this year in some categories, so the effort to crunch the logs solidifies our recognition of the winners.

I'm hoping that we can get back to a more regular meeting schedule for the rest of 2005. Looking ahead beyond the Miami and Orlando hamfest meetings, we have a meeting at the Fort Walton Beach hamfest on Saturday, March 19. With the FQP following at the end of April, less than 11

weeks away, it would be great to find a meeting host for a meeting earlier in April to plan for it and in early May to relive the fun.

The Dayton Hamvention is the third weekend of May. Thanks to Charlie, NF4A's efforts, the FCG will again host a hospitality suite. I hope to once again award a number of FQP plaques in person this year. 2004's suite was our first ever and was a huge success. See you there?

Speaking of Charlie, congrats are in order for being appointed to the post of ARRL Contest Advisory Committee representative for the Southeastern Division. While we all know the battle we are trying to fight regarding the 175-mile circle that prevents the Panhandle group from combining scores with the rest of the FCG, there are other issues that the CAC addresses. They welcome your input, so please contact Charlie with any thoughts and ideas.

A quick apology is in order for my relative lack of attention to the club in recent months. Work obligations have crept in, but I hope to soon have them wrestled back to a reasonable level. Thanks for bearing with me.

Let's get back to having fun at this neat hobby of ours in 2005. GO FCG! OJ!

vy 73, Dan, K1TO

Charlie NF4A named to

On January 19 Charlie NF4A posted the following note to the reflector:

Effective today, I have been appointed by W4RH as the new Southeastern Division CAC (Contest Advisory Committee) representative.

Congratulations Charlie! It's great to have an FCG member on the CAC.

The following new members have joined FCG since the last newsletter:

K4QQT Scott Woodruff, 29637 South Dixie Highway. Ste # 374, Homestead FL 3033 e-mail: stw12003@yahoo.com

VE3XD/W4 Don Cassel, 700 Starkey Road # 623, Largo FL 33771 e-mail: ve3xd@rogers.com

KC4FWS Jim Hughes 11432 Lowndesboro Drive, Jacksonville FL 32223-1376 e-mail: kc4fws@arrl.net

W4CEO Maurice Schietecatte, 9450 SE 137th Street, Summerfield FL 34991-8208 e-mail: scat42@earthlink.net

W4PAM Frank C. Harris, 512 E. Pasadena Ave, Clewiston FL 33440 e-mail: fcharris44@earthlink.net

Activity Calendar

Orlando Hamfest 12-13 Feb—Luncheon Meeting at Noon on Saturday at Picadilly Café, 1840 E. Colonial Drive (SR50)

CQ WW RTTY WPX Contest 0000Z, Feb 12 to 2359Z, Feb 13

North American Sprint, CW 0000Z-0400Z, Feb 13

ARRL Inter. DX Contest, CW 0000Z, Feb 19 to 2400Z, Feb 20

CQ 160-Meter Contest, SSB 0000Z, Feb 26 to 2359Z, Feb 27

North American QSO Party, RTTY 1800Z, Feb 26 to 0600Z, Feb 27

ARRL Inter. DX Contest, SSB 0000Z, Mar 5 to 2400Z, Mar 6

BARTG HF RTTY Contest 0200Z, Mar 19 to 0200Z, Mar 21

CQ WW WPX Contest, SSB 0000Z, Mar 26 to 2359Z, Mar 27

2005 FCG Dues are due!

It's that time of year again. Dues collections went well in January. If you haven't paid yet, please make your dues check out to Florida Contest Group and send it to:

**Fred Perkins
3437 Lake Josephine Drive
Lake Placid FL 33852**

Dues for receipt of the newsletter through download from the FCG site are \$10, for a mailed hard-copy \$15.

Thanks for your cooperation.

**73, Fred K4LQ
Treasurer FCG**

W4OV/VP9 in CQWW SSB

By Bruce Phegley W4OV

Bermuda, VP9, is 600 miles due East of Cape Hatteras, NC. A cluster of islands connected by bridges 24 miles long and less than a mile wide. This semi tropical island has temperatures similar to South Florida because of its proximity to the Gulf Stream. The people are very friendly, speak English and the US dollar is swapped evenly with the Bermudan dollar. Excellent airport, roads, bus and ferry transportation makes it a pleasure to get around.

Ed Kelly, VP9GE, was our host. He furnished us with two nice apartments in his complex; several antennas, DSL and his courtesy assistance made our stay very enjoyable. (see <http://wwwlqsl.net/VP9GE>)

Other activities of interest were Scuba diving, historical tours. Barcardi World headquarters are in Hamilton, Bermuda.

We were blessed with fantastic propagation and good weather. We would recommend this place to anyone especially those who are interested in instant pile-ups, especially on CW. Bruce W4OV, Julio WD4R, Fred K9VV and Steve W4DTA all had a great time. 73 from all.

Our station consisted of 2-ICOM 706s, 2 lap top computers running CT, A3 and A4 yagis, a G5RV and a dipole in MSLP 3840 X 408 111 4,767,015

FCGers Rebuilding after Hurricane Damage

By Fred Perkins K4LQ

Good news is starting to come in as to progress in rebuilding by our members.

K4XS - The winds came through on Christmas night and finished off some of the undetected previously weakened elements on the 15 stack...so back up the tower to fix those. Total damage for the storms:

Cracked boom to mast plate lower 40.....lowered to ground and replaced

Broken elements on 20 meter beams at 150, and 200...lowered to ground and replaced

All 4 15 meter beams had broken elements and cracked boom to element mounts...all broken stuff fixed on tower
Two 10 meter beams had broken elements from the broken 20 meter elements raining down on them.

One broken Tailtwister.....cracked spur gear, several more Tailtwister suffered sheared bolts and one had a cracked head. The top 40 Tailtwister suffered a damaged indicator. Except for the cracked spur gear rotor, all others need to be worked on, but they are functional to some degree.

Water intrusion on several dipole coax....garbage bin and new coax.

In addition, all 19 HF antennas were blown off the correct settings and had to recalibrated on the towers.

K4VUD - My new 70 foot crank up tower is now connected to its base fixture but still lying on its side awaiting rising to vertical. I have on hand the 40 m quad that goes up there in due course.

KG4WW - Lost part of my beam in VP5...25% of our roof and misc other damage - all repaired except the beam....maybe on the next trip over.

K4LQ - Back up on all bands. The pushup pole 80 Meter vertical has been replaced with a small aluminum tower plus stinger vertical. The demolished 5 band quad has been replaced with a 6 band 3 element SteppIR. The 160 Meter Marconi has been replaced with an Inverted Vee. The 2 element Cushcraft 40 Meter Yagi and tower have been overhauled and are back in action.

Many thanks to FCGers **N4TB**, **N4TO**, **W4IR** and **W4QM** who aided mightily in these endeavors. **W4QM** came close to the "Forester of the Year" award for his performance of the Cocoa Beach two-step at the very top of an extension ladder while simultaneously cutting off several limbs from the two remaining trees in the vicinity of the antenna to allow the new SteppIR yagi to rotate freely.

W1YL/4 - Saturday Jan 8 a number of the crew spent the day taking down broken beams and pulling up unused cables etc.

Dan K1TO and Jeff WC4E in a rare moment off the tow-

Removing 10 Meter beam with a broken boom.

Removing broken 20M beams from tower

Broken beams finally down

Frank KA0GGI, Joe K4IK and Kevin N4KM working on deforestation of the antenna area at W1YL.

W1YL Responds to Tsunami*By Fred Perkins K4LQ*

Ellen W1YL read the e-mail below on one of the major reflectors.

Dear member or friend of RAST,
As you have no doubt heard, the western coast of Thailand was devastated by a tsunami (tidal wave) on Sunday morning and as rescue efforts continue on Tuesday afternoon the death toll now exceeds 1,000 and is likely to rise to over 2,000 as more bodies are recovered from remote areas and islands.

In addition, over 7,500 Thais and foreign tourists are now receiving medical attention.

The Thai government has appealed for donations to assist people in the devastated areas while RAST understands that as far as Thailand's communications needs are concerned, the situation is now under control. Thai hams are helping to relay information between the affected areas along the west coast in the South to government agencies, mostly on VHF and 40 metres, as well as disseminating news and information over VHF frequencies in Bangkok.

Echolink, too, has played a role in enabling radio amateurs here to relay information to concerned friends and relatives of those holidaying in the affected areas.

I have spoken with our President Mrs Mayuree Chotikul, HS1YL, and to other officers of RAST as to what our society might be able to do to help in the wake of this disaster and, in particular, as to how to respond to offers of help and support already received from ham friends around the world.

We agree that what is now needed the most is help for the many thousands made homeless by the tsunami and so RAST is now accepting donations and will pass on all financial support received to the Thai Government which has opened a channel for this.

We will, of course, give full credit to the international amateur radio community and to the individual donors and donor organisations.

The best way to transfer funds to RAST for this purpose is by wire transfer, the details of which follow:

Siam City Bank
Ratchawat Branch No 111

Account Type: Savings
Account Number: 111-2-22688-4
Account Name: RAST

(Full name: Radio Amateur Society of Thailand, under the Royal Patronage of His Majesty the King)

We also ask that all donors send details of their support to dx@thai.com by email or by Fax to +662-321-6443 for our records so that we can acknowledge this and give full credit. Please help Thailand in this time of need in any way you can, and we encourage you to pass this appeal along to any others whom you feel may be able to help.

Thank you
Sincere 73,
Tony Waltham, HS0ZDX
Vice President,
Radio Amateur Society of Thailand
Under the Royal Patronage of His Majesty the King

Ellen decided to make a contribution to the RAST Tsunami Relief effort from the W1CW/K4OJ Memorial Fund.

On Saturday January 15, I sent the following e-mail to the RAST Vice President in Thailand:

At the direction of Ellen White W1YL, I wire transferred \$200 USD from the W1CW/K4OJ Memorial Fund to the Siam City Bank in Bangkok Thailand for deposit in the RAST Tsunami Relief Fund. The Florida Contest Group maintains an account for the above Memorial Fund and dispenses funds as directed.

Best wishes as you continue your recovery from the Tsunami disaster.

73,
Fred Perkins K4LQ
Treasurer, Florida Contest Group

I received the following reply on Sunday January 16.

Dear Fred,
Thank you, the Florida Contest Group and Ellen White, W1YL, for your generous support in this time of need. The Radio Amateur Society of Thailand (RAST) deeply appreciates your donation, which will be passed on organisations here that are helping the victims of this disaster.

We will let you know later how your donation, along with those made by many other radio amateurs and their representative organisations, has helped to alleviate some of the suffering and loss as a result of the tsunami on Dec 26, 2004.

Sincere 73
Tony Waltham, HS0ZDX,
Vice President,

VU4 Memories

By Charly Harpole K4VUD

For over four years I have been working with VU2RBI, Bharathi, to try to get VU4 operating permission after a 17 year hiatus. Mid-November 2004, she got that permission and had to start ops by the first of December and only for one month. She and four other VU hams were on the permit list number one and they began transmissions to the multitudes from Andaman on time. I joined them there mid December as a helper and photographer. I was "on the list" to be among the "second team" of permitted operators, but the permit came after I had to depart Asia to come back to Fla. to teach the Spring semester.

As everyone now knows, once the huge earthquake and Tsunami struck that area, the VU4 team converted to emergency communications mode and continued for over two weeks, providing vital communications for many parts of the Andaman and Nicobar Island chain.

At about 6:30 AM the morning after Christmas local time, I was shaken out of bed in my fifth floor room in the DXpedition HQ hotel. Bracing myself in the doorway, I had trouble standing up as the floor shifted and bottles and bits of concrete ceiling fell. It happened too fast to get frightened, and I rushed out of the hotel as soon as the shaking stopped. Everyone was out already, including Bharathi who had the adjoining room.

The ham antennas stood up ok on the roof and very quickly the VU4 team activated the rigs on an outside table using the hotel's generator. Bharathi passed a message to phone my wife in Thailand that I was ok and then began taking health and welfare traffic from the hotel staff and guests. I told everyone that there would likely be a BIG WAVE coming in about a half hour, and two of the team got a three-wheel taxi and ran around in Port Blair telling folks to get away from the coast. Only four people died when the 15 foot wave hit the town's sea wall.

Over the coming days, the team and other VU hams were deployed with government workers all over the Islands and provided vital com links to the whole area.

Not speaking the language they were using, I took my regularly sked air ticket back to Thailand to check on my wife and her family. They felt nothing, it turns out but were mightily worried about me. I used my HS0ZCW station to relay a few emergency and H&W messages for the Indian hams.

Many news media found me for interviews. I tried to emphasize the value of ham radio to them.

The DXpedition, prior to the emergency, made over 35,000 contacts and used all bands up to 6 meters and "all" modes including some sstv, PSK, and RTTY. There were three stations active at all times in separate locations in Port Blair using VU4RBI and VU4NRO (the NIAR club call).

Of course, I want to go back and try to use my permit, but UCF duty calls.

Meanwhile, ham radio has gotten a real positive exposure in that part of the world. I think much good will come for ham radio from the horrible tragedy.

Skywarn Recognition Day

By Eric Smitt K9ES

Yesterday and Friday night, I set up a Multi-Multi Station at the National Weather Service Melbourne and used the call sign WX4MLB. We had participation from Osceola Skywarn and Brevard Amateur Radio Emergency Services. Even NWS staff took time to make QSOs and log. Several are licensed, and one in particular is a damn good operator.

Antennas were set on 4 crank up emergency towers. The 20M 3 element monobander was at 45 feet. We had a rotor on that one. All others were around 35 feet (2 element 40 made from the scrap pile from my hurricane damage, 3 element 15 and A4S for 10) with arm/string rotation. An 80M dipole was strung from the 65 foot level of the radar tower to the 80 foot level of the instrumentation / communications tower some 200 feet away. The ends were NNW and SSE.

Stations were set up with 20M in the rear equipment shed, and all the others from the conference room. On 20M, I used my IC756Pro2 with an Ameritron AL572 running a KW. On 15 / 40 Meters, we used an IC765 with Amp Supply AL1000. On 10 / 80M we used an IC756Pro2 with an Ameritron AL811H amplifier. Between radios and amplifiers were ICE bandpass filters.

On VHF, we used the IC706Mk2G and some 6M and 2M antennas mounted on the Osceola EOC trailer / 60 foot hydraulic mast. No 450 was used.

No equipment suffered receiver degradation from the strong RF of other radios. The antennas played very well.

We made 1537 QSOs with some great DX. The 20M station made 798 QSOs by itself. At around Midnight on Friday night on 20M, I worked into a VK / ZL / South Pacific WX net on 14.290. Besides the VK's and ZL's that we worked, we also QSOs a YJ8. 20 Was dead at that time. The VK's and ZL's were not hearing anything coming from the states, and the rest of the band was dead!

We made several QSOs via Packet through the digital repeater on the International Space Station as well as an ISS QSO.

The operation produced 3 times as many QSOs as ever made from WX4MLB during a Skywarn Recognition Day. We believe that the operation may have placed NWS Melbourne at the top of all NWS Stations. Hope some of you had a chance to work us. QSL via QRZ.COM info.

FCG Contest Forum at the Tampa

By Dan Street K1TO

Thanks again to those who took the time to help with our FCG-sponsored contest forum.

Ron, WD4AHZ took the time to lay out many details related to the FCG-sponsored Florida QSO Party. Log entries passed the 700 mark this year, in just our 7th running. The mobile window was a big hit and looks to be continued in future years.

Danny, T93M/N4EXA did a great job on his first PowerPoint presentation and showed us lots of interesting pix of Bonaire where he recently operated PJ4J in CQWW SSB, chasing the World SOABLP record.

Tony, W4OI (ex N7BG) explained each of many pictures of the high lush hillside at the HK3CQ station that he piloted using 5K5Z just last weekend in WW CW on 20M single-band low power.

Dan, K1TO took a PowerPoint presentation developed by XE1KK and W6NL and enhanced it with some recent pix from last weekend's HC8N M/2 adventure. The 4-man team broke the M/2 World Record by a wide margin with over 32 million points. The presentation covered much of the 6-year history of the station in HC8.

Thanks to Blake, N4GI for bringing cups, plates, napkins, ice, soda, etc. and handling the 10-pizza delivery.

I'll take a stab at listing the members I saw in the forum or in the hamfest: K1KNQ, K1TO, K4LAW, K4XS, K4XSS, KA0GGI, KP3AC, N4GI, N4LML, T93M/N4EXA, W1ROX, W4DN, W4OI, W4ZW, WD4AHZ
